Interactive Front-Facing Teaching
ViewSonic® ViewBoard® Mini IFP2410

Perfect for large classrooms, lecture halls, and auditoriums, the ViewSonic ViewBoard Mini transforms podiums and lecterns into smart collaboration hubs for front-facing teaching. With integrated myViewBoard™ digital whiteboarding software, ViewBoard Cast streaming software, and a 10-point touchscreen, the 24" ViewBoard Mini makes content creation and sharing easier than ever before. Educators can manipulate and control content, files, images, and annotations on the ViewBoard Mini touchscreen, then share that content on a larger front-of-classroom display or projector. For dynamic lessons and interactive collaboration, multiple presenters can simultaneously draw, write, and annotate on the ViewBoard Mini as well.
