

## Key Features

- 3LCD Laser Projector
- WXGA 1280 x 800
- 3,500 ANSI Lumens Brightness
- 2,000,000 : 1 Contrast Ratio
- 40,000 hours Light Source Life (Long life 2 mode)
- 2 HDMI Inputs
- Quiet Operation 34dB
- Lightweight, Compact Chassis Design
- No Lamps to Replace!
- Supports Web Control, PJLink, Crestron Connected®, and AMX

## Maxell expands their laser projector line with a 3,500 ANSI lumens, 3LCD model ideally suited for class and conference room environments.

Maxell's laser light source projector line now includes the 3LCD model MP-JW3501 with 3,500 ANSI lumens. The new laser phosphor light source offers approximately 20,000 hours (normal mode) of operation time and is virtually maintenance free, there is no lamp to replace providing a dramatic reduction in total cost of ownership. Ideal for classrooms to conference rooms, the MP-JW3501 combines superior image quality, long life reliability and low noise level. A new highly effective cooling system protects the optical unit from dust intrusion and lowers the noise level to 34dB. A new phosphor chip replaces the phosphor wheel and motor resulting in fewer moving parts for higher reliability. The color performance of 3LCD produces the same brightness for all white and all color resulting in accurate color representation and outstanding image quality. For added peace of mind, Maxell's MP-JW3501 is backed by our world-class service and support programs.

maxell

The J series models have a new phosphor technology with a ceramic phosphor chip. This decreases the amount of moving and magnetic parts for stable performance, higher reliability and a lower noise level.

Display rotation of 360° and portrait projection for creative applications and greater installation flexibility.

Copy configuration settings from one projector to others of the same model via USB memory. Cloning can save almost all PJ settings such as gamma and keystone via USB memory.

Enables the user to adjust individual corners and sides independent of one another. Perfect Fit 2 provides vertical and horizontal digital correction of either barrel or pin cushion distortions. This feature helps correct geometric and complicated distortions. Perfect Fit 2 allows the projected image to fit correctly to the screen quickly and easily.

Our iOS application offers full projector control and also provides the capability to display photos, document files and web site contents. Available for iPad®, iPhone® and Android devices. Works over your LAN via your RJ-45 port or via an optional USBWL5G wireless adapter.

The new J Series Lineup can support specific control commands (RS-232C and LAN) of several other projector brands to make replacement easy. Supported functions: Power ON/OFF, Input Source, Volume Control, Mute (Picture/Audio/Shutter).

The timer function can be used for count up or count down, perfect for use in classrooms or conference rooms.

Supply DC 5V 2.0A power to streaming devices through USB. Supports popular streaming devices such as Amazon Fire TV 2nd and 3rd generations, Google Chromecast 3rd generation and Ultra, EZCast Pro2, Barco ClickShare C SE-200, wePresent, and QuattroPod.

Users can rename input sources in more descriptive terms instead of the factory default names.

Embedded networking gives you the ability to manage and control multiple projectors over your LAN. Features include scheduling of events, centralized reporting, image transfer and e-mail alerts for reactive and routine maintenance.

By using a USB memory stick or other storage device, you can use the projector without a computer. Menus are easy to see with a thumbnail display. There is also a slideshow function. This feature also supports the following file types: JPG, PNG, BMP, and GIF.

PIN lock protection can limit projector users. MyScreen PIN lock keeps captured images on the startup screen. Users can set any name logo to MyScreen, clearly identifying ownership. MyText provides the ability to write text on the startup screen such as model name, serial number or location.

PJMessenger function allows you to send and display text messages and audio alerts on your networked projectors. It is an easy and efficient way to send announcements out to multiple units.

Maxell's suite of networking software allows you to easily send content directly from your PC to the projector via your LAN connection.

A label is affixed to side of projector to more easily access and read the model name, serial number and MAC address while mounted in ceiling use. This is a convenience for installers, end users and auditors for instant accessibility.

Connect the projector to a computer or your network using the optional USB wireless adapter (part number USBWL5G). The adapter supports IEEE802.11 a/b/g/n/ac.

## Long-life reliability with a lower total cost of ownership.

From classrooms to conference rooms, Maxell's MP-JW3501 can make a big impact on your audience. With 3,500 ANSI lumens brightness and WXGA 1280 x 800 resolution, the MP-JW3501 is designed to make any message more memorable with colorful images, crisp text, and powerfully clear audio.

Incorporating Maxell's leading edge technology, the MP-JW3501 combines superior image quality, long life reliability and low noise level. For added versatility, the MP-JW3501 supports web control, PLink, Crestron® Connected, and AMX. Plus, for added peace of mind, Maxell's MP-JW3501 is backed by our world-class service and support programs.
